

TEXAS WELLNESS HEMORRHOID TREATING DEVICE: The Future of Painless Hemorrhoid Surgery

TEXAS WELLNESS HEMORRHOID TREATING DEVICE: The Future of Painless Hemorrhoid Surgery

Introducing the TEXAS WELLNESS HEMORRHOID TREATING DEVICE, the latest innovation in the Anorectal Treating Device Series. Designed for the treatment of proctologic diseases, this advanced hemorrhoid tissue fusion surgical device offers multiple functions, high technology, and a wide range of applications. With its reliable security and minimal patient suffering, This device ensures superior treatment outcomes.

Key Innovations and Advantages:

This advanced Tissue Fusion Vessel Sealing Technology (TFVS Tech) ensures

- No Carbonization, Treated hemorrhoid tissue dries up without carbonization, reducing postoperative complications like edema, pain, and anal stenosis.
- Hemorrhage Prevention: Effectively addresses the surgical challenge of post-operative bleeding, ensuring safer procedures.

Minimal thermal collateral damage: The device ensures minimal collateral thermal damage to the neighbouring normal tissue, promoting quick recovery and minimal discomfort for patients and no sequelae.

Wide Application Range: Ideal for treating internal, external, and mixed hemorrhoids, anal fissures, anal fistulas, rectal polyps, perianal abscesses, hypertrophy of anal papillae, and condyloma acuminatum. Also suitable for use in dermatology and gynecology.

Clinical Benefits:

- ✓ Rapid Treatment: Each hemorrhoid treatment takes only 3-5 seconds, ensuring quick and efficient procedures.
- ✓ No Post-Surgery Hemorrhage: Patients experience minimal suffering and optimal curative effects, if procedure is done properly.
- ✓ Clear Treatment Boundaries: Tissues become dry and hard without carbonization, ensuring high-security treatment zones.
- ✓ No Need for prolonged Hospitalization: most of the Patients can go home same day- Truly a day care surgery.

Versatile Treatment Accessories:

1. TFVS Pincers:

- ✓ Measures hemorrhoids intelligently and seals the base, ensuring no blood flow.

2. TFVS Forceps:

- ✓ Instantly arrests bleeding in larger blood vessels, providing immediate relief.

3. MONOPOLAR Pencil:

- ✓ Excises unnecessary hemorrhoid tissues with precision, offering adjustable output power to meet various demands.

Advanced Features:

1. Intelligent Identification: TFVS technology identifies hemorrhoid tissue size, consistency and ensures treatment without setting time or power manually.
2. Professional Quality and Safety:
 - a. Certified under ISO9001 and 13485 quality management systems.
 - b. Holds Class III medical device registration from SFDA.
 - c. Features multiple national patents, ensuring cutting-edge technology and reliability.
3. Pre-Return to Zero Output Power: Guarantees safe and reliable protection.
4. One-Year Warranty and Life-Long Maintenance: Ensures long-term support and peace of mind.

Technical Specifications:

- ✓ Power Voltage: AC 220V±22V
- ✓ Frequency: 50Hz±1Hz
- ✓ Operating Conditions: Temperature: 5°C~40°C:
- ✓ Relative Humidity: ≤80%
- ✓ Atmospheric Pressure: 70.0 kPa~106.0 kPa
- ✓ Safety Classification: Class I, BF type
- ✓ Working Frequency: 1.25MHz±0.125MHz
- ✓ Input Power: 100 – 240 VA
- ✓ Output Power: Adjustable from 1-100W with high precision

Why Choose the Texas WELLNESS HEMORRHOID TREATING DEVICE?

Experience unparalleled hemorrhoid treatment with the TEXAS WELLNESS HEMORRHOID TREATING DEVICE. Its innovative TFVS technology, rapid and efficient treatment process, and comprehensive safety features make it the ideal choice for medical professionals. Upgrade your treatment capabilities and ensure your patients receive the best care possible.
